

Defoaming agent

RP-6299

Features and Advantages:

Antifoaming agent RP-6299 is a modified silicone emulsion, widely used in ink and coating systems, applied to pure propylene, styrene-acrylic emulsion system, PU dispersion, acrylate emulsion, in the high viscosity system of micro elimination effect is better. Mixing well before use can effectively improve its compatibility in the system.

Product Specifications:

appearance	Milky white viscous liquid
viscosity	1000-4000mPa·s (25°C)
The active ingredient	50%

Scope of application:

Printing ink and optical oil
Wood paint and furniture paint
Industrial paint
leather coating

Dosage: 0.1-0.5% of the total formula

Add method:

1、Stir and disperse for a certain time before use

2、 can be added at the grinding or painting stage

3、It is recommended to test compatibility before use to achieve the best results

Package: 200kg/25kg net weight

Storage: Keep away from heat and fire. Keep in a cool and ventilated place. Keep container close. The shelf life of this product is 18 months from the date of production
