

PP/PE plastic material advanced adhesion resin

P-1700

Features and advantages:

- 1, PP/PE excellent adhesion: P-1700 is a high-performance chlorine modified resin. It has excellent adhesion to various types of PP/PE plastic materials, and has good affinity to most commonly used solvent-based resins, and is widely used in advanced coating systems.
- 2, easy construction: P-1700 is used in the color primer of polyolefin substrate, without any corona, flame and solvent cleaning class of pre-cleaning.
3. Excellent adhesion: Excellent adhesion at low baking temperature, good description with other resins, and good flexibility.

Product specification:

appearance	Yellow particle
Solid content	100%
Viscosity (30% toluene	30-150 (mpa.s 25℃)

Application fields: automobile bumper, ink printing, product shell coloring, fine shell coloring, etc.
