

Closed type salt spray resistance agent

RT-3109

Product features and advantages:

RT-3109 is a kind of hydrophobic salt spray sealing agent with the best comprehensive performance, with excellent adhesion, water resistance, corrosion resistance, rust prevention and other characteristics: it can effectively improve the transparency, hardness, gloss and QUV resistance of the film. Good storage stability, fast reaction rate, can be cured at low temperature (90°C).

Product parameter:

appearance	Light yellow liquid
Active matter	25%
solvent	IBA
PH	7.3-7.7
type	DNNDSA

Applications: Widely used in partial etherification, butyl etherification amine baking paint, acrylic baking paint, polyester baking paint and other systems

Usage: 0.7%/2.4%/6% of the total solid content of the resin in the coating formula (baking temperature is 204 °C /120 °C /90 °C). When used, IBA:N-525=1:1 dilution is good, and the effect is better after mixing evenly during paint production.

Packing: 25kg/ barrel

Storage strip: Stored in a cool and dry place at 2-35°C, away from the sun and away from the fire.
