## Water-based environmental protection compound drier RT-3110

### Product features and advantages:

This product is based on a variety of metal carboxylate and mixed with high efficiency accelerator to make it synergistic effect, belongs to high efficiency drier. It can completely replace naphthenic acid drill, lead, manganese and other dry materials. Compared with traditional dry materials, it has the performance of convenient use and less consumption and lower cost.

### Product parameter:

|                        |                                  |
|------------------------|----------------------------------|
| appearance             | Reddish brown uniform liquid     |
| Metal content          | >15                              |
| Solubility in solvents | Total solution                   |
| Solution stability     | Transparent without precipitates |

**Product application:** mainly used for water-based alkyd blend

**Recommended dosage:** 0.4-0.6%;

**Packing:** 200KG/ drum, iron drum

**Storage strip:** Stored in a cool and dry place at 2-35°C, away from the sun and away from the fire.
