

Dispersant

RD-9681

Features and advantages:

Dispersant RD-9618 is a kind of weak anionic copolymer aqueous solution containing high pigment affinity groups, dispersing carbon black/organic pigment/inorganic pigment in water-based system, with good coloring power, good viscosity reduction effect, good storage stability of color paste, good water resistance, alcohol resistance stability.

Product parameter:

appearance	Transparent liquid
Non-volatile	40±1%
Specific gravity	1.02g/cm ³
Chroma (Gardner)	≤5
Boiling point	≥100℃
PH	6-7

Application field:

* Preparation of a variety of high-end non-resin water-based color pastes
Automotive paint (putty and primer), industrial paint, wood and furniture paint

* Flexo and gravure inks, inkjet inks

Reference add:

The recommended addition amount for the above uses is 5.0-30.0% for inorganic pigments, 20-70% for organic pigments, 40-120% for carbon black, and 0.5-2.0% for co-grinding.

Add: Add to abrasive before dispersion

Packing: Net weight 25Kg/ barrel, 200kg/ barrel.

Storage: Away from high temperature and fire; Place in a cool and ventilated place; Seal after use; The shelf life is 36 months.
