

Antistatic agent

RT-3090

Features and advantages:

RT - 3090 is a low viscosity organic amine salt compounds, can be used in the soft, PE, PET, PS, PVC film in the printing ink on the surface of the antistatic effect, can improve the friction resistance, floating color, hair flower ink products performance, and can prevent the high-speed printing ink splashes and printing product dust phenomenon, which has the characteristics of convenient use, low dosage.

Product specifications:

Appearance	Colorless transparent liquid
Make up	Organic amine salt
Solid content	100%

Application:

solvent-based printing ink

Recommended amount:

total ink < 0.1 to 0.5%

Usage:

it can be added in any stage of ink production, if added before ink use, it needs to be stirred evenly.

Packing:

25kg non-recycled blue iron drum. The product is not used completely, after use must cover tightly inside and outside.

Storage:

keep away from heat and fire and keep away from light.
