## Adhesion promoter

### RT-3165

#### Features and advantages:

RT-3165 can significantly promote film (adhesive) and a variety of inorganic substrate adhesion, is mainly used for glass, ceramic and concrete, such as inorganic substrate, and the epoxy resin, polyurethane and acrylic water-based resin system such as good compatibility, can achieve more than 6 months shelf life, safe environmental protection, no organic volatiles release in the drying process.

#### Product specifications:

appearance	Colorless to light yellow transparent liquid
Valid copy of	49±2 %
The proportion of	1.02±0.02g/cm <sup>3</sup>
Flash point (open	98°C

#### Application areas:

1. Improve the adhesion of inorganic substrate in water-based epoxy resin, polyurethane, acrylic and other resin coatings and adhesives;
2. Adhesion of glass paint to the substrate;
3. Surface treatment of inorganic fillers.

---

**Recommended dosage:** 0.2-3wt % of the total formula. It is recommended to determine the best dosage and compatibility before use.

**Packing:** 200kg/25kg plastic drum
