

Wetting dispersant

RD-9211

Features and advantages:

1. It has a special effect on the arrangement and orientation of the dumb powder, so that the dumb powder is arranged neatly on the paint surface and the paint surface luster is uniform.

2. Good wetting effect, and to prevent the settlement of dumb powder in the paint.

3. Excellent dispersion effect of pigment, can reduce the tension between pigment or filler and resin.

Product specifications:

appearance	Yellow to brown liquid
composition	High polymer compound
Valid copy of	100%

Application scope:

Industrial coatings, anticorrosive coatings, wood coatings, coil coatings, automotive coatings

Recommended dosage:

Inorganic pigments	Organic pigments	Carbon black	The whole amount
1.0-3.0%	3-10%	15-30%	0.1-0.5%

Usage: Add before grinding for full effect.

Packing: 25KG non-recycled blue plastic drum. The product is not completely used, need to tighten the lid after use.

Storage: keep away from fire and light source and keep away from light
