

Polyether modified polysiloxane leveling agent

RF-7450

Features and advantages:

RF-7450 is 100% active content of polyether modified polysiloxane leveling agent

1, this product is specially modified polysiloxane, provides good substrate wetting and anti-shrinkage performance of high efficiency silicone surface additives.

2, increase the film surface smoothness and scratch resistance and anti-adhesion; Reduced paint airflow sensitivity; It prevents the formation of Benard vortex and improves the luster of leveling. Good compatibility with most coating systems

Product specifications:

appearance	Light yellow to amber transparent liquid
Active content %	97
solvent	-
The refractive index	1.4300-1.4400
viscosity (25°C)	200-500cs

Application: suitable for solvent - based, solvent - free and water - based coatings.

Recommended dosage: total formula volume 0.05-1.0%;

Usage: can be added in original or pre-diluted form.

Packaging: 25KG/200KG non-recycled blue plastic drum. Cover tightly if the product is not completely used.

Storage: away from fire, and placed in a cool and ventilated place; It lasts for 12 months under normal storage conditions.
