

PP plastic adhesive

PP

Features and advantages:

PP adhesive has excellent adhesion to PP plastic substrate, PP/EPDM and non-ferrous metal surface.

Can be directly sprayed on the substrate surface to improve the adhesion of the upper coating to the substrate, and improve water resistance, solvent resistance.

Product specifications:

appearance	Pale yellow liquid
Valid copy of	40%
solvent	Aromatic hydrocarbon
The density of	0.982
Flash point	35

Application areas:

Plastic paint, PP/EPDM surface treatment.

Recommended dosage and usage:

- 1. Wipe the substrate clean.
- 2. Spray PP adhesive directly on the substrate, dry film thickness of 3-7um, stand at room temperature for about 20 minutes.
- 3. Spray the top coat, let stand for about 10 minutes, and dry for about 30 minutes at $80^{\circ}\mathrm{C}$.

Packaging: 25kg non-recycled plastic drum. The product is not completely used, the lid must be tightly closed after use.

Storage: keep away from heat and fire and keep away from light.
